Full-stack engineer who leans backend. At Educanet since January 2025, where I build and run three products that are live in production. I design for the cases that break software in production — two users booking the same slot, payment callbacks, crashes — and ship with Docker, tests and monitoring.

EXPERIENCE

Full-Stack Developer · Educanet, Tunis — Jul 2025 – present

- **BookPro** (bookpro.educanet.pro) — built and run end to end: booking platform for independent professionals, web + Android, 4 languages. Spring Boot 3.5 / Java 21, Angular 20, MySQL, Docker on a VPS with nightly backups, Prometheus + Grafana. Bookings are concurrency-safe (row locks), live updates over STOMP.
- **Massarat+** (massarat-plus.com) — primary engineer, encryption and payments: education marketplace with Konnect, GPG and D17 payments plus a prepaid wallet; documents encrypted at rest and served only after purchase; real-time parent–teacher chat. Spring Boot 3.5, Angular 19/20, Expo.
- **Medi+** — primary engineer, backend and back-office: medication reminders with a per-minute engine, full-screen alarms through FCM, offline sync and an alert to the family after a missed dose. Spring Boot 4.1, Angular 20, React Native.
- Production deployment: WAR artifacts on Apache Tomcat and Dockerised services on Linux.

Full-Stack Developer Intern · Educanet, Tunis — Jan 2025 – Jun 2025

- **SportClub** (live demo) — built a sports-club platform: Angular console for staff and coaches, React Native app for parents, one Spring Boot API with ownership checks on every endpoint so each family sees only its own children. 20 tests.
- Shifted from feature delivery to reliability-focused system thinking.

SELECTED PROJECTS — all playable at majd-abbassi.vercel.app

Car Rental Manager — live demo

Fleet, contracts on a calendar, payments and reports. Two simultaneous bookings of the same car: exactly one wins (SELECT … FOR UPDATE). 27 integration tests. Spring Boot 3.5, Angular 18.

SwiftDeliver — live demo

Delivery marketplace: companies bid or are auto-assigned, drivers report positions, customers follow the order live over STOMP; Grafana monitoring. 73 tests. Spring Boot 4.1, Angular 20.

Mall OS — live demo

Multi-tenant mall management: shop units traced on a floor plan, leases, monthly rent billing, CSV exports. 41 tests. Spring Boot 4.1, Angular 18.

CaféResto — team of 3 · backend architect

Multi-tenant restaurant platform: QR ordering, live kitchen and stock over STOMP, AI menu import (EasyOCR + LLM), 13-service Docker stack with Prometheus, Grafana and Alertmanager. Spring Boot 3.5, PostgreSQL, React, Expo.

Also: Albumy (event photo albums filled live, Redis + worker), FriendMap (location sharing with server-enforced privacy, NestJS), InsightHub (CSV analysis with a local LLM, FastAPI + DuckDB), ReachFlow (n8n outreach automation).

SKILLS

Backend: Java 21, Spring Boot, Spring Security, JPA / Hibernate, REST, WebSocket / STOMP, JWT, Quartz, PostgreSQL, MySQL, Redis, Flyway

Frontend: Angular, TypeScript, React, React Native / Expo

DevOps: Docker, Docker Compose, Nginx, Linux, Tomcat, GitHub Actions, Prometheus, Grafana, Alertmanager

Other: Git, Maven, Python, FastAPI, NestJS, n8n

EDUCATION

Engineering degree, in progress — 2025 – present
Polytechnique de Sousse, Tunisia

Licence in Computer Science — 2022 – 2025
ISITCOM, Hammam Sousse, Tunisia · Bac+3
